Hi Tonya,

Are you familiar with this person selling caracals? They have customer # 321133 and were issued a packet in Feb 2018 and have not gotten licensed. The applicant told the potential buyer that they have been waiting 4 month for their USDA inspection.

ACIS shows they were previously sent a license packet but cancelled their application. It appears they are importing caracals and reselling them without a USDA license.

Can you tell me if any arrangement has been made which is allowing them to sell animals while they wait for their inspector to inspect them? Thanks

Greg

Dr. Gaj,

This importer in NY would have a replacement caracal male for the one I lost. Just not sure if his credentials are sufficient. Could you please have a look at his attached license(s) not sure if I may buy from him. Having second thoughts. He is an importer.

Thanks again for your time.

Birgit,

In NYS there is an exemption to exotic cat ownership and sale if you are an incorporated humane society. As we place cats in shelters, we are covered under that aspect of the law. Additionally, the DEC does not regulate caracals, only the USDA, and only if being paid as an exhibitor, not for ownership. I have included a copy of those documents, as well as my USFW import license.

A care sheet is attached. I'm sure you already know how to care for them properly though :)

You should get an email from docuSign for the contract. It just covers sale price and that you have 7 days to check at vet. It's my standard contract but if you need any changes just let me know.

Hi Chris, this email is to confirm our agreement, for you to send :
2 baby caracals, (1 m, 1 f) to Tampa International Airport
The purchase price for both animals, incl. vet health certificate, crate and Delta Dash shipping charges is \$11,000 (ELEVEN THOUSAND US)
Both animals are reliably self feeding and deemed healthy.
Besides the law mandated health guarantee for congenital diseases you are offering me a 7 (seven) day health guarantee in which I can have these caracals examined and tested out by my own attending veterinarian. Should there arise concerns about these caracals being unfit you will immediately refund the whole purchase amount and animals will be returned to you at your expense.

I will need a copy of your license and copy of health certificates please.

I will tomorrow apply for my import permit from Florida Fish and Wildlife, which normally takes 1 to 2 days.

I will also send a business check overnight to the address you have provided. (Baywater Holdings LLC, [REDACTED])
If you could please send the pictures and videos of them to my email, so I may forward.
Do you have an exact birth date and are these 2 related?

My stats:

[REDACTED]

Think this covers our understanding.

Hope to hear from you soon.
best,

[REDACTED]
